

Vaibhav Yadav

Senior Consultant ServiceNow

vaibhavkyy@gmail.com | 9958539335 | Male | Noida, India | <https://vaibhavkyy.github.io/resume/>

Profile

Dedicated ServiceNow Developer with 3+ years of experience in designing, developing, and implementing solutions within the ServiceNow platform. Experienced in various aspects of ServiceNow development, including, module configuration, UI customization, and integrations. Skilled in translating business requirements into technical solutions to streamline processes and enhance productivity. Ability to collaborate with cross-functional teams to deliver high-quality solutions aligned with business objectives. Strong expertise in JavaScript, ServiceNow APIs, and best practices for platform optimization and performance tuning.

Work Experience

Senior Consultant ServiceNow, Infocenter

2024/11 – present | Pune, India

Client: Multi-service provider, USA

Key Contributions:

- Designed and developed ServiceNow integrations with multiple third-party service providers to automate Change Task fulfilment and updates.
- Centralized integration management** by creating a Platform Host table to consolidate automation IDs, connection status, and related data; implemented one-click enable/disable control, improving visibility and administrative efficiency.
- Automated CMDB refresh processes to ensure accurate and up-to-date license count information.
- Worked in a **domain-separated environment** within ServiceNow, ensuring secure, isolated data management and tailored configurations for multiple clients.
- Utilized Identification and Reconciliation Engine (IRE) via scripts to synchronize CMDB data for IP routers and wireless access points (WAPs) through a scheduled REST API integration.
- Enabled real-time visibility into software license usage, helping the organization proactively manage license compliance and avoid overuse.
- Reduced manual efforts and minimized errors by implementing end-to-end automation for change management tasks.
- Improved operational efficiency and accuracy in ITSM processes by streamlining ServiceNow workflows and integration logic.
- Collaborated with cross-functional teams to ensure seamless data exchange and consistent performance across platforms.
- Enhanced the organization's governance capabilities by delivering reliable, auditable automation for critical IT operations.

Software Analyst, Accenture plc

2023/10 – 2024/10 | Noida, India

Client: Europe-based pharmaceutical giant

Key Contributions:

- I have been part of this project from the initial requirement gathering phase to the whole development to deployment phase and provide support in the Hypercare phase.
- Created a custom REST API inbound framework utilizing two custom tables that is used by more than 10 applications to connect to ServiceNow to create service request, create incident, update task, update incident and read the data from ServiceNow tables.
- Worked on SCCM integration to bring end user devices into the configuration management in ServiceNow.
- Worked on Azure SSO integration.

- Worked on GIAM REST API integration to sync the user information with the help of integration hub and scheduled imports.
- Worked on EC and Memphis REST API integration to bring and sync up the foundation data (Cost center, Department, Business unit, Company, Location)
- Worked on SAP integration with SOAP to automate the password reset and user unlock with the help of SOAP action and Flow.
- Created a scheduled script job with REST connection to deactivate the inactive users.
- Created JDBC connection with Spectrum system to sync the CI data (Router and Switches).
- Automated the AD integration to assign licenses to users in AD and remove the licenses with the help of Flow.
- Basic level understanding of LDAP and MID server integration.
- Created Technical documentation and provided KT while handing over the development to support team.
- Deployed all the updates to the various instances from Development, Test, QA and Production.

Associate Software Engineer, Accenture plc
