## Professional Summary

Senior ServiceNow Developer with 4+ years of hands-on experience designing scalable applications, reusable frameworks, and enterprise integrations. Proven ability to act in a lead capacity, translating business requirements into maintainable technical solutions while collaborating with global architects and product owners. Strong expertise in JavaScript, Glide API, Flow Designer, IntegrationHub, and Agile delivery. Committed to balancing customization vs. configuration to ensure platform stability, performance optimization, and adherence to enterprise security and compliance frameworks.

## Core Skills

- **ServiceNow Development:** Script Includes, Business Rules, Client Scripts, UI customization, Notifications, Scheduled Jobs, ACLs, scoped applications, update sets, migrations, and technical documentation.
- **Integrations:** REST APIs, SOAP services, JDBC, IntegrationHub, third-party platform integrations, inbound API frameworks, data synchronization, and error-handling design.
- **Platform Capabilities:** ITSM, Change Management, Incident Management, Service Catalog, Flow Designer, Knowledge Management, CMDB, IRE, Import Sets, Transform Maps, Scheduled Imports, and data migration.
- **Tools & Practices:** ServiceNow scripting (JavaScript, Glide API), Agile delivery models and backlog-driven development, deployment support, hypercare, stakeholder collaboration, troubleshooting, and performance optimization.

## Professional Experience

### Senior Consultant – ServiceNow | Infocenter

## **Nov 2024 – Present | Client: US-based Managed Service Provider**

- Designed and developed ServiceNow integrations with multiple third-party platforms to automate license assignments, license removal, fulfillment updates, and related business application updates.
- Built a reusable automation framework using a custom Automation ID table with template-based and Script Include driven execution, asynchronous control, success and failure tracking, and manual effort savings capture.
- Developed integrations for Nucleus, FortiEDR, Qualys, NinjaOne, Meraki, Mimecast, Azure, and other client platforms to support account lifecycle and operational automation.
- Created a Platform Host table by extending the Business Application to centralize integration configuration, control operational status, and improve governance for platform connections.
- Built a Contact Response Framework using configurable conditions and automation mappings to trigger context-aware actions from task records, including automated watch-list management scenarios.
- Developed a scalable Report Framework for third party reporting services with configurable report definitions, platform-specific processing, report retrieval, and subscription-based email distribution.
- Utilized IRE-based scripting and integration patterns to synchronize CMDB data for infrastructure devices and maintain accurate operational records.
- Delivered secure and scalable solutions in a domain-separated ServiceNow environment for multi-client MSP operations.
- Provided technical guidance and mentorship to junior developers on ServiceNow coding standards, promoting sustainable solutions by balancing customization with out-of-the-box configurations.
- Collaborated with global multi-functional teams, architects, and product owners to translate business requirements into scalable technical solutions aligned with enterprise governance.

## **Software Analyst | Accenture**

### **Oct 2023 – Oct 2024 | Client: Europe-based Pharmaceutical Enterprise**

- Contributed across the full ServiceNow delivery lifecycle, including requirement gathering, development, deployment, and hypercare support.

- Built a custom scalable inbound REST API framework using custom tables to enable 10+ applications to create and update records and read ServiceNow data through standardized integration patterns.
- Implemented integrations for SCCM, Azure SSO, GIAM, EC, Memphis, SAP, Active Directory, and Spectrum to support user, device, and foundation data synchronization and process automation.
- Worked with IntegrationHub, Scheduled Imports, Import Sets, and Transform Maps to ingest, transform, and synchronize data from external systems into ServiceNow.
- Automated user administration processes and CI synchronization workflows using REST, SOAP, JDBC, and flow-based automation approaches.
- Prepared technical documentation, supported knowledge transfer, and managed deployment activities across Development, Test, QA, and Production instances.

## **Associate Software Engineer | Accenture**

**Jun 2022 – Sep 2023** | Client: US-based Shipping Enterprise

- Supported end-to-end ServiceNow development across implementation, configuration, and deployment activities.
- Configured Incident Management, Change Management, Knowledge Base, Service Catalog, and Flow Designer solutions aligned with business requirements.
- Developed Business Rules, Client Scripts, Script Includes, Scheduled Jobs, Scheduled Imports, Import Set processing, and Transform Maps for platform automation and data handling.
- Integrated Microsoft Teams with ServiceNow and contributed to LDAP and SSO-related implementation work.

## **Certifications**

- ServiceNow Certified System Administrator (CSA)
- ServiceNow Certified Application Developer (CAD)
- ServiceNow Certified Implementation Specialist - Data Foundations (CMDB and CSDM) (CIS-DF (CMDB and CSDM))
- ServiceNow Certified Implementation Specialist - IT Service Management (CIS-ITSM)

- ServiceNow Certified Implementation Specialist - Human Resources Service Delivery (CIS-HRSD)
- ServiceNow Micro-Certification - Flow Designer

## **Education**

### **Master of Computer Applications (MCA)**

Galgotias College of Engineering and Technology | 75%

## **Awards**

- SPOT Award, Infocenter.
- Extra Mile Award, Accenture.
